

83-1565 QUANTUM PEN LIGHT

(800) 233-1294

www.kimballmidwest.com

The 83-1565 ultra bright and super compact flashlight is convenient for all types of maintenance work. CREE® XPE LED provides 115 lumens of superior light output. This incredibly thin pen-style design makes this light easy to store in a pocket or toolbox for quick and easy access. A recessed push-button switch design helps prevent accidental activation in a pocket or tool box.

INSTALLATION:

Note: Batteries not included. Requires (2) AAA batteries (83-678).

1. Install two (2) AAA batteries in EXACT (+/-) direction into the barrel as below.

⚠ DANGER Installing batteries in reverse will cause the batteries and light to short circuit. This will damage the light and batteries, and can cause battery explosion.

2. Screw on the tail cap and tighten.

OPERATING INSTRUCTIONS:

Completely push down the switch button until it clicks for switching ON/OFF.

**WARNING**

Do NOT shine directly into anyone's eyes.

SPECIFICATIONS:

LED	CREE® XPE
Brightness	115 lumens max.
Battery Size	2xAAA (not included)
Run Time	40 minutes approx.
Overall Length	5-1/4"
Head O.D.	0.59"
Net Weight	1 oz. (excluding battery)

MAINTENANCE:

1. Remove the batteries if you don't need to use the flashlight for a couple of weeks or more.
2. Switch off the light and wait until the light has cooled down before you clean the optical lens or the housing.
3. Do not touch or try to clean the surface of the reflector or high power LED.
4. Lubricate the waterproof rubber O-ring with a little Vaseline once every 3 to 6 months.
5. Keep the bare metal contact areas inside the barrel and those inside the end-cap clean.

**CAUTION**

Do not use solvents such as gasoline, turpentine, etc, to clean the unit. Aerosols and other chemicals may fog the clear lens.

**DANGER**

DO NOT dispose of batteries in a fire.
